THE WORLD OF  AT 1/2 SCALE

OUR ICONIC CLADDING SOLUTIONS IN OUR **Mini**[®] SIGNATURE

*Mini, mini, mini, everything in our
range is mini.*

We designed our latest collection while humming this little tune. We've redesigned the profiles that paved the way to our company's success, producing them in ½ scale versions.

This approach brings us closer to our claddings. A scale that is perfectly suited to close-up product versions, whether on a balcony or indoors.

Given the small size of the TOYS range ribs bottoms, it is highly recommended to first check the compatibility of the screw heads with the selected cladding model.

SECONDARY FRAMING

Metal framing «L»

Metal framing «Z»

Metal framing «Ω»

Ajustable metal framing «Z»

Ajustable metal framing «Ω»

Timber frame

FLATNESS OF SUPPORT

The secondary framing elements must be sized by the installation company. Metal framing should be at least 1.5mm thick.

The flatness of the support is essential when installing the panels.

Regardless of the type of secondary framework chosen (metal or wood), it must comply with a maximum permissible co-planarity of 2mm over three **e supports**.
